

MEMORANDUM FOR: NIOs, SA/NPI, C/ACIS

→ NIO/EA

It's time once again for the semiannual update of the NIC Production Plan. This time--at least for now--the exercise should be somewhat simpler than usual.

Please review the items on the attached draft listing that correspond to your domain (they may be scattered among several pages and sections). You should make any necessary corrections or updates on any item there that requires it, and add information on any new papers you definitely plan to produce over the coming year. (In this regard, please take note of the recent State cable (copy attached) that lists "priority countries" for US intelligence concentration over the next year or so.)

Please provide me with written revisions/additions (either annotated on the attached draft, or separately) by COB 26 June. Thanks very much.

Date

18 June 81
